David Short

Maximal exercise testing in patients with spontaneous angina pectoris associated with transient ST segment elevation. Risks and electrocardiographic findings *J.-M. R. Detry, P. Mengeot, M. F. Rousseau, J. Cosyns, R. Ponlot, and L. A. Brasseur*

Continuous assessment of left ventricular shape in man *D. G. Gibson and D. J. Brown*

Non-invasive left ventricular volume determination by two-dimensional echocardiography *J. Gehrke, S. Leeman, M. Raphael, and R. B. Pridie*

Hypertrophic obstructive cardiomyopathy. Assessment by echocardiographic and Doppler ultrasound techniques *D. R. Boughner, R. L. Schuld, and J. A. Persaud*

Long-term survival of patients with incomplete bundle-branch block complicating acute myocardial infarction *E. Lichstein, P. K. Gupta, and K. D. Chadda*

Surgical implications of right aortic arch with isolation of left subclavian artery *L. Rodriguez, T. Izukawa, C. A. F. Moës, G. A. Trusler, and W. G. Williams*

Coarctation of aorta with right aortic arch. Report of surgical correction in 2 cases: one with associated anomalous origin of left circumflex coronary artery from the right pulmonary artery *M. Honey, J. C. R. Lincoln, M. P. Osborne, and D. P. de Bono*

893	Variations in clinical presentation of Fallot's tetralogy in infancy. Angiographic and pathogenetic implications <i>E. A. Shinebourne, R. H. Anderson, and Jean J. Bowyer</i>	946
897	Comparative study of sinoatrial conduction time and sinus node recovery time <i>G. Steinbeck and B. Lüderitz</i>	956
