Supplementary figure

Supplementary figure 1. (A) Intra operative view of trans-aneurysmal approach to open left ventricular cavity with layers of organized thrombus seen on ventriculotomy (B) Gross specimen of thrombus removed form left ventricular apical aneurysm. (C) Neck of aneurysm is closed with a Dacron patch. (D) A High magnification photomicrograph of the histopathology specimen showed distinct lines of Zahn indicative of thrombus.

Supplementary Video Legends

Video 1. Transthoracic echocardiogram – apical 4 chamber view and Modified apical 4 chamber view focusing on the left ventricular apex
