Remarks:
1. vertical text
2. blue boxes not aligned to described categories (see red indicator lines), and redundant
3. missing boxes/categories for exclusions: ‘duplicates removed’; studies not in quant. analysis
4. unnecessary boxes/categories
5. redundant repeating text (eg. ‘records’, ‘n=’)
6. centered text
7. counts centered under text

online appendix Figure 5.

PRISMA 2009 Flow Diagram

1. Records identified through database searching (n= )
2. Records after duplicates removed (n= )
3. Records screened (n= )
4. Records excluded (n= )

- Identification
- Screening
- Eligibility
- Included

Additional records identified through other sources (n= )

Full-text articles assessed for eligibility (n= )

Studies included in qualitative synthesis (n= )

Studies included in quantitative synthesis (meta-analysis) (n= )

Full-text articles excluded, with reasons (n= )
