Volume 106 Issue 6 | HEART 15 March 2020

Heartbeat

401 Heartbeat: sudden cardiac death risk predicted by simple ECG measures
C M Otto

Editorials

403 Keep it simple: the ECG and sudden cardiac death risk
M F Sinner, K D Rizas, S Kääb

405 Can we improve the appropriateness of PCI?
S V Arnold

407 Cloudy forecast for appropriate use criteria
S M Bradley

409 Should we give up on motivational interviewing? Not so fast.
J Y Breland, M V Stanton

Expert consensus statement

411 Lifetime cardiovascular management of patients with previous Kawasaki disease
P Brogan, J C Burns, J Conask, V Dwakar, D Elefteriou, J B Gordon, H H Gray, T W Johnson, M Levin, I Malik, P MacCarthy, R McCormack, O Miller, R M R Tullio, Kawasaki Disease Writing Group, on behalf of the Royal College of Paediatrics and Child Health, and the British Cardiovascular Society

Review

421 Three-dimensional and four-dimensional flow assessment in congenital heart disease
E Warmerdam, C J Krings, T Leiner, H B Grottenhuis

Arrhythmias and sudden death

427 Predicting sudden cardiac death in a general population using an electrocardiographic risk score

Coronary artery disease

441 Association between procedure appropriateness and patient-reported outcomes after percutaneous coronary intervention
J X Yang, M J Stevenson, L Valsentin, K Ho, J A Spertas, R W Yeh, J B Strom

Cardiac risk factors and prevention

447 Reducing weight and increasing physical activity in people at high risk of cardiovascular disease: a randomised controlled trial comparing the effectiveness of enhanced motivational interviewing intervention with usual care
K Ismail, A Bayley, K Twist, K Stewart, K Ridge, E Britteff, A Greenough, M Ashworth, J Rundle, D G Cook, P Whincup, J Treasure, P McCrone, K Winckley, D Stahl

Congenital heart disease

455 Tricuspid regurgitation severity after atrial septal defect closure or pulmonic valve replacement

Heart failure and cardiomyopathies

462 Alcohol septal ablation in patients with severe septal hypertrophy

Heartbeat: sudden cardiac death risk predicted by simple ECG measures
C M Otto

Congenital heart disease

Tricuspid regurgitation severity after atrial septal defect closure or pulmonic valve replacement

Heart failure and cardiomyopathies

Alcohol septal ablation in patients with severe septal hypertrophy
## Contents

### Pulmonary vascular disease

**467** Growth differentiation factor-15 as candidate predictor for mortality in adults with pulmonary hypertension  

### Cardiology in focus

**475** From finding sports partners to medical case sharing: transforming ideas into reality  
A Qasim

### Image challenge

**426** Right ventricle dilatation: the big five  
R Jansen van Rensburg, A F Doubell, P G Herbst
