

... A MAJOR ADVANCEMENT IN ELECTROCARDIOGRAPHY ...

.....Marquette introduces MAC II.....

The MAC II is a compact, portable electrocardiograph which provides an immediate ECG interpretation for physician review.

The MAC II, equipped with a transmitting and/or recording option, will provide the communication link with a Marquette MUSE central ECG system, thereby providing the user with storage, centralized physician review and editing.

Standard features of a MAC II include:

- A new writer/printer which uses Marquette's unique Striped Pressure Scribe Paper®
  - Marquette's 12 SL ECG Analysis Program
  - A wide selection of ECG formats
  - Easy one button operation
- To learn more about the MAC II, contact your Marquette Sales Engineer.
