

VACANCY: CARDIOLOGY IN FOCUS SECTION EDITORS

Heart, published by BMJ and co-owned with the British Cardiovascular Society, has an exciting vacancy for an enthusiastic editor to join the journal's Cardiology in Focus section.

Heart is an international peer reviewed journal that keeps cardiologists up to date with important research advances in cardiovascular disease. The journal promotes active interchange among researchers and readers to come together as a community to advance science and improve patient care. More information can be found at heart.bmj.com.

The Cardiology in Focus section (heart.bmj.com/pages/collection/cardiology-in-focus) consists of short articles on topics of particular interest to trainees, junior cardiologists and cardiovascular researchers. Topics might include career advice, interviews with researchers or leaders in the field, tips on publishing, how to interview for an academic or clinical position, how to keep up with the medical literature, challenges faced at different career stages, issues related to women in cardiology etc.

The journal is seeking enthusiastic cardiology trainees or junior cardiologists to commission and write relevant articles for this section. They will be responsible for identifying topics of interest, inviting potential authors to contribute, reviewing and editing the content (as needed), and participating in the journal's editorial processes. Each Cardiology in Focus article can be up to 1500 words in length with a flexible format in terms of style, figures, tables and online supplements.

The Cardiology in Focus editors will report directly to the journal's Editor-in-Chief, and will be invited to participate in occasional editorial meetings. The initial term will be for one year, with possible renewal for an additional year upon mutual agreement.

To apply, please send a brief CV and covering letter (including up to 5 ideas for potential articles) to Caitlin Alder, Publishing Executive at BMJ, at calder@bmj.com. The deadline for applications is **3rd March 2024**.
